

## SHAKE WELL BEFORE USE

Rustins Drive & Patio Sealer is a quick drying transparent sealer that dries to a natural matt finish for use on driveways, patios and pathways. It dries with a long lasting and water repellent film and provides an effective barrier against water and other substances that may stain the surface. It is recommended to try a small test area first to check for compatibility and end result. Not suitable for marble.

## Preparation

The surface must be clean and dry and free of any mould, fungal growth or solid matter likely to interfere with the penetration of the sealer. Rustins Drive & Patio Cleaner can be used for cleaning if required. Do not use below 10° C.

## Application

**Shake well before use.** Do not apply if rain is imminent. Do not dilute the product. Use a large paint brush or long haired roller and apply a liberal coat of Rustins Drive & Patio Sealer. Only apply one coat and allow the surface to dry for 24 hours. Depending on how the product is applied and the weather conditions, stone slabs will remain damp for up to one hour after product application. If correctly sealed, any water dropped on the surface after 24 hours will form beads.

## Cleaning

Clean brushes and equipment immediately after use by washing in warm water and detergent.

## Maintenance

After 6 to 12 months carry out a beading test. If water no longer beads then clean and re-apply the sealer.

## Storage

Store in a cool dry place with lid tightly closed. Protect from frost.

## Health & Safety

Keep out of reach of children.

Do not get in eyes, on skin, or on clothing. Wear protective gloves and eye protection.

**IF SWALLOWED:** Immediately call a POISON CENTRE or doctor if you feel unwell.

**IF ON SKIN:** Wash with plenty of water.

**IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

EU limit value for this product (Cat A/e): 130g/l (2010). This product contains max 57g/l VOC.
