

Rustins

Ring Remover

Removes water and heat marks
from most wooden surfaces

SHAKE WELL BEFORE USE

Rustins Ring Remover is a mixture of fine abrasives dispersed in a special water based lubricating medium used to remove water and heat mark damage from a range of polished surfaces such as lacquers, varnishes and French Polish. Ring Remover will also restore the gloss and remove minor defects from finishes.

DIRECTIONS FOR USE: Pour the Ring Remover onto a lint free cloth and rub with pressure over the mark in the direction of the grain until the mark is removed. If the mark does not disappear apply more Ring Remover to the cloth and continue rubbing until the mark is removed. Buff with a clean cloth and then wax if required. For deeper marks the Ring remover can be applied with Rustins Fine Steel Wool (grade0000). For satin or matt finishes the same grade of steel wool may be used to matt the surface down after the Ring Remover has been used as it may produce a shiny surface.

IMPORTANT: Test the product on an inconspicuous area to ensure that it is compatible with the surface. Sometimes very severe heat or water damage marks can penetrate through to the wood in which case the only remedy is to remove the old finish with Rustins Strypit Paint and Varnish Remover. On open grained wood, a white deposit may be left in the grain after the Ring Remover has dried. This can be removed by brushing the grain with a nail brush and water and drying with a clean cloth.

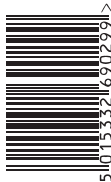

HEALTH AND SAFETY

Contains gum turpentine. May produce an allergic reaction. Keep out of reach of children. Do not get in eyes, on skin, or on clothing. IF SWALLOWED: Call a POISON CENTRE or doctor if you feel unwell. IF ON SKIN: Wash with plenty of soap and water. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Wear protective gloves/protective clothing/eye protection/face protection. If skin irritation occurs: Get medical advice/attention.
