

Rustins

Xylene Thinners

Dilution of Paint:

Rustins Xylene Thinners is suitable for dilution of Rustins Damp Seal and Rustins High Heat Paint. It may also be used as a diluent for most oil-based paints. An addition of 10-15% is recommended. For certain types of spray equipment this may need to be increased but it is advisable to test first.

Cleaning of Equipment:

Rustins Xylene Thinners or Rustins Brush Cleaner can be used to clean brushes and other equipment that has been used with Rustins Damp Seal and High Heat Paint. Remove as much product as possible from the brush or other application equipment prior to cleaning. Pour a small amount of the thinners into a jar or tin and work into the brush or roller. Press the brush down to ensure the thinners cleans away paint that has worked its way up to the stock.

IMPORTANT: For equipment where the paint has dried hard, Rustins Brush Restorer is recommended for cleaning.

Storage: Store in a cool dry place with lid tightly closed.

HARMFUL

FLAMMABLE.

Repeated exposure may cause skin dryness or cracking.

Keep out of reach of children.

In case of contact with eyes rinse immediately with plenty of water and seek medical advice.

After contact with skin wash immediately with plenty of water.

Wear suitable protective clothing and gloves.
