DIRECTIONS FOR USE	
	<p>BRIWAX is a fast drying blend containing natural waxes suitable for use on most wooden surfaces.</p>
	<p>SURFACE PREPARATION: Unsealed wooden surfaces should be smooth, dry and clean. Apply BRIWAX using a lint free cloth or 0000 steel wool thoroughly working the wax into the grain. Once dry buff to desired finish with a clean soft cloth. Improved shine and durability can be achieved by first sealing the surface with BRIWAX Sanding Sealer. For antiques and pre-finished furniture, first check compatibility, then apply BRIWAX in small areas with a clean soft cloth.</p> <p>The BRIWAX finish can be maintained by further applications which will give increased hardness and shine.</p>
	<p>This product is not recommended for use in areas where it will come in contact with water. Above 20°C BRIWAX will soften and liquify. Replace lid, put in a cool place and it will return to its original state.</p>
