## SILVER PLATING SOLUTION

For plating  
and re-plating silver  
Contains pure silver

### A Sense of Tradition

This unique solution adds pure silver to your worn silverplate (and hard base metal such as brass, copper, nickel and bronze) by molecular plating. The result is permanent and will not chip, flake or peel. Your silver will also be cleaned and polished. It will not be effective on soft base metals such as aluminium.

#### Directions for use:

1. Cover all work surfaces. Wear gloves.
2. Shake the bottle thoroughly.
3. Apply liberally with a clean cloth or sponge. Darkening often occurs as the transfer of silver takes place.
4. Rub firmly for 10-15 seconds.
5. Buff lightly with a soft cloth. A beautiful shine will appear and the silver plating process is complete.
6. If necessary, reapply to badly worn areas or to increase the thickness of the silver.

#### Health and Safety

Keep out of reach of children.

Wear protective gloves/protective clothing/eye protection/face protection.

IF SWALLOWED: Call a POISON CENTRE or doctor if you feel unwell.

IF ON SKIN: Gently wash with plenty of soap and water.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

Avoid release to the environment.
