PRODUCT DATA SHEET

Product	Mitre Fix Adhesive
Type	High viscosity cyanoacrylate adhesive.
Intended Use	Use for bonding irregular or porous components
Special Features	Solvent-free single pack adhesive. Slow cure allows adjustment during assembly.
Preparation	Ensure surfaces are clean, dry and free of loose material.
Application	Apply beads of adhesive from container onto one surface. Apply activator to second surface and press surfaces together for 10 seconds. Best results are obtained on close fitting parts.
Coats	One application
Drying Time	Fixture time 5-60 seconds. Full cure in 24 hours.
Re-coating Time	Not applicable
Application Temp.	Working range; +5 to +30 degrees Centigrade.
Coverage	Not applicable
Maintenance	Not applicable.
Compatibility	Suitable for use with MDF and veneered wood surfaces, rubbers, plastics, metals and ceramics.
Settlement	Not applicable
Shelf-life/Storage	Minimum 12 months when stored in a cool, dry place out of direct sunlight in original, sealed container. Do not store below +5 degrees Centigrade.
Hazards	Irritant. Avoid eye and skin contact as this product will bond surfaces together. In case of skin or eye contact wash copiously with water. Wear suitable protective glasses and gloves. Keep away from children. Health and Safety Data Sheet available on request.
Clean-Up	Dissolves in acetone/nail varnish remover.
Sizes	20g & 50g dropper bottle.
