Hazards	<p>Carefully pull the metal pick tool from the handle and ensure it is locked in place prior to use.</p> <p>Take care when using the metal pick tool and always point the sharp end away from the body and hands and away from close proximity to other people.</p> <p>Always ensure the metal pick tool is properly safely enclosed within the handle when not in use or while using the brushes or scraper.</p> <p>Always use the pick tool and scraper with the handle 'up', i.e. with the pick tool folding mechanism not visible. In this position the cut out circle just before the scraper can be used as a location point for the forefinger to apply gentle pressure.</p> <p>NOTE; Excessive force when using this tool is not recommended and may cause the tool to fail.</p>
Clean-Up	Clean with soapy water.
