PRODUCT DATA SHEET

Product	Bio-Blue
Type	Enzyme-based liquid concentrate for the cleaning and treatment of chemical toilets.
Intended Use	For treatment of chemical toilets in coaches, trailers, caravans, trains, boats, commercial aviation and portable toilets.
Special Features	Biodegradable. Contains specially selected ingredients which do not just mask smells, but continuously digest them as it breaks down organic toilet waste. A natural product not harmful to the environment. Good stability. Long shelf-life. Economical. Compatible with water purifiers. Replaces products based on formaldehyde, bronopol, glutaraldehyde and quaternary ammonium.
Preparation	Retention drums must be clean and free of all previously used chemical cleaning products.
Application	Add 10% Bio-Blue by volume to the total volume of water to be treated. Can also be used as a top tank rinse at 10ml per 10 litres.
Coats	Not applicable
Drying Time	Not applicable
Re-coating Time	Not applicable
Application Temp.	Ideally 15 – 25 degrees C. Avoid use in frost.
Coverage	See Application Section
Maintenance	Not applicable
Compatibility	Do not mix Bio-blue with disinfectants, chlorinated products, acids, formaldehydes or other chemical cleaning products
Settlement	Shake well before use.
Shelf-life/Storage	Store in cool-dry place. Protect from frost
Hazards	
Clean-Up	Clean with water.
