

The action of Flue Free Chimney Cleaner stops and removes tar/creosote build up, reduces risk of chimney corrosion and maintains clean heating surfaces for maximum efficiency.

HOW IT WORKS

Flue Free Chimney Cleaner is a combustion deposit conditioner. It works by rising into the chimney on the flue gases. On contact, Flue Free Chimney Cleaner reacts with the acids in the tar/creosote deposits and 'fluidises' them. Absorbents in Flue Free Chimney Cleaner then soak up these fluids, producing a shrivelling or drying action, which weakens the bonding to the chimney surface. These deposits eventually fall back down the chimney or are removed more easily by sweeping. It is advisable to arrange for the chimney to be swept prior to commencing. Flue Free Chimney Cleaner should be used on a regular maintenance basis. It should reduce the frequency of chimney sweeping needed, however regular sweeping is still essential. Chimneys should be inspected once or twice a year to ensure clean and safe conditions. It can be used in wood stoves, open fireplaces and solid fuel equipment.

It is suitable for use with all flues, including those lined with stainless steel. Flue Free Chimney Cleaner is non-corrosive.

HOW TO USE

- For maximum effectiveness use on a low fire with tray emptied. The fireplace should be lit but almost burnt out. Carefully place the sachet in the centre of the fire.
- To accelerate the process, close the damper/stove door and place fireproof metal sheets across the fire opening.
- Let the fire burn out and dispose of the cooled ash/debris
- Use 2 sachets for large fires or boilers or where chimney flue is abnormally large or dirty.

Not for use on gas or electric fires

FLUE FREE CHIMNEY CLEANER

REMOVES TAR & CREOSOTE
PREVENTS FURTHER BUILD UP
PEAK BURNING EFFICIENCY

SAFETY INFORMATION

Causes skin irritation.

Causes serious eye damage.

May cause respiratory irritation.

Do not breathe dust or mists.

Wash thoroughly after handling.

IF INHALED: Remove person to fresh air and keep comfortable for breathing.

Call a POISON CENTRE/doctor if you feel unwell.

IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with

water/shower. Wash contaminated clothing before reuse.

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
